Remote Shut-Off Meter Policy

Slippery Rock Municipal Authority is offering replacement meters, with remote shut-offs, to owners of premises with two or more individual meters supplied by a single service line curb stop (shut-off) located outside the premises.

- Owner(s) may request an upgrade from existing meters to Sensus Ally meters (remote shut-off).
- Ally meters will require plumbing changes inside the premises; these changes are to be completed by the Owner, at the Owner's expense.
- Ally meters and meter sets are to be purchased by Owner, from the Authority.
- The current new value of the existing meters at the premises will be credited toward the purchase of the Ally meters; and
- Additionally, per meter, the monthly customer service fee will be increased to cover the cost of any future replacement of the Ally meter (currently the fee will be an additional \$1.50/month/meter).
- Before Ally meters are ordered, the Authority must receive payment in full for the meters.
- All costs for Ally meters will be calculated based on current pricing for the meters (including any replacement fittings and shipping/handling charges).
